

ICM-2000

The allrounder in
card mailing and
delivery

ICM-2000

We start,
where others finish ...

ICM-2000

Card Mailer and Delivery System

unique, modular, flexible

Modular Structure. The modular design of the ICM-2000 offers a neverseen flexibility and functionality in the mid-range card mailing and inserting segment.

Glue or Tape. With its modularity it is possible to fix the card with either adhesive tape or glue onto the document. It is also possible to change later at any time from tape to glue.

Card Mailer or Lettershop. The mailer is designated as a card mailer, but can be used as a classic document mailer as well.

PIN Mailer. After adding an additional Scratch-Off Module the mailer can run as a card mailer with PIN letters or as a straight PIN-Mailer. The system can apply special scratch-off labels to PIN/PUK numbers on the document.

Process Security. Additional options, f.e. Ultra-Sonic Sensors, cameras, are able to add extra security features to the machine and the entire process.

Special Formats. With some adaptations it is also possible to run ISO-Cards as well as Keyfob cards with a bigger length through the machine.

Match and Attach. The system can be equipped with a typical laser printer or with a sheet feeder for match and attach.

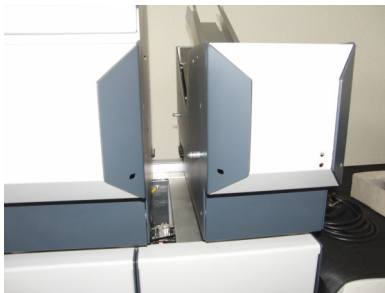

Software. Our self-developed Windows Software ICSPMS offers an easy Document design based on Word for Windows and supports all common Windows OS.

Key features & facts

- ▶ Stand-Alone & Inline Functionality
- ▶ Production Performance up to 3.100cph
- ▶ Card input with changeable magazine
- ▶ Magnetic stripe reading (LoCo&HiCo)
- ▶ Contact smart card reading
- ▶ Contactless smart card reading
- ▶ Top and bottom 1D barcode reading
- ▶ 2D barcode and Datamatrix or MRZ reading
- ▶ Camera reading available
- ▶ 6 cards per carrier possible
- ▶ fully modular design
- ▶ processing of plastic & paper cards
- ▶ Microsoft® Word Templates
- ▶ Carrier Collation Module
- ▶ Document feeder available
- ▶ compact design and footprint
- ▶ 24/7 operations
- ▶ Scratch-off function for PIN-Mailer
- ▶ transparent, clear card processing
- ▶ flexible card positioning
- ▶ No card process,
- ▶ New range of professional high-speed laser printers
- ▶ Ultra-Sonic verification module for Card/Carrier check

INNOVATIVE CARD SYSTEMS always a STEP ahead...

Technical Specifications ICM-2000 Cardmailer & Inserter

Performance	Up to 2200 cards/hrs
Card Reading	Magnetic Stripe Loco/Hico Contact Chip / Contactless Chip Barcodes 1D / 2D / Datamatrix OCR-A / OCR-B / MRZ Plain characters
Carrier Reading	1D / 2D
Paper Format	DIN A4 / US-Letter, A5 and others on request
Paper Feed	Laser printer or Vacuum sheet feeder
Card Affixing	Standard by double-adhesive tape, Optional: by glue
Cards per Carrier	Up to 4 cards folded, up to 6 cards non-folded
Folding + Inserting	Z-fold + V-fold, DIN lang DL, C5/C6 and others on request
Collection Method	Up to 2 personalized documents can be added before folding
Additional Inserts	Up to 4 additional insert stations can be added Thickness up to 6 mm
Software	ICSPMS Software with integration of Word for Windows ®
Operating System	Windows 7®, Windows 8®, VISTA®, Windows 10®
Security Options	Ultra Sonic Sensors (card detection, paper detection, double paper detection, label detection) Camera Reading of Document/Card Q&A Station
Special Functions	PIN/PUK covering by Scratch-off labels Security Sealing of Envelopes Flip-over Station for cards Reject for Cards and Paper Lettershop functionality
Manufacturer	„Made in Germany“ by Innovative Card Systems®
